Designer Bug Report

Generated 19 Oct 2026

Reported by divyapriyadharshini
Projects tested TrafficSense, SkyFare, Brain Arena, JobPilot, PowerWise
Total bugs 8 (2 High, 3 Medium, 3 Low)

Project	Live site	GitHub	Bugs
TrafficSense	https://trafficsense-brown.vercel.app	https://github.com/DIVYAPRIYADHARSHINI-GIT/trafficsense	2
SkyFare	https://skyfare-seven.vercel.app	https://github.com/DIVYAPRIYADHARSHINI-GIT/skyfare	1
Brain Arena	https://brainarena-two.vercel.app	https://github.com/DIVYAPRIYADHARSHINI-GIT/brainarena	1
JobPilot	https://jobpilot-zeta-tan.vercel.app	https://github.com/DIVYAPRIYADHARSHINI-GIT/jobpilot	2
PowerWise	https://powerwise-dusky.vercel.app	https://github.com/DIVYAPRIYADHARSHINI-GIT/powerwise	2

Bugs

Bug 1: Browser test hung without a timeout (TrafficSense)

Severity: High | **Status:** Reported

Steps: 1. Ask Designer to run the end-to-end test against the local dev server.
2. Wait for the headless Chrome run to finish.

Expected: The test fails fast with a clear error when a page does not load.

Actual: Headless Chrome waited forever and the run had to be stopped by hand.

Evidence: None attached

Bug 2: Page froze while retraining on a large CSV (TrafficSense)

Severity: Medium | **Status:** Open

Steps: 1. Open Insights.
2. Upload a 20k-row CSV and click Retrain.

Expected: A loading state, then the new model metrics.

Actual: The tab stopped responding for several seconds before the result appeared.

Evidence: Screenshot (https://trafficsense-brown.vercel.app)

Bug 3: Hydration warning on the fare calendar (SkyFare)

Severity: Low | **Status:** Fixed

Steps: 1. Search BLR to DEL.
2. Turn on Budget mode and open the fare calendar.

Expected: No console errors.

Actual: A hydration mismatch warning because dates were rendered in the server time zone.

Evidence: Screenshot (https://skyfare-seven.vercel.app)

Bug 4: Vercel GitHub App could not see the new repo (Brain Arena)

Severity: Medium | **Status:** Reported

Steps: 1. Ask Designer to deploy to Vercel with GitHub auto-deploy.
2. Push a new commit.

Expected: The Vercel project is linked to the repo and every push deploys.

Actual: Linking failed until the Vercel GitHub App was given access to the repo by hand.

Evidence: Chat link (https://github.com/DIVYAPRIYADHARSHINI-GIT/brainarena)

Bug 5: Vercel GitHub App cannot see new repository (JobPilot)

Severity: Medium | **Status:** Fixed

Steps: 1. Create the GitHub repo with gh.
2. Run vercel git connect.

Expected: Auto-deploy is connected.

Actual: Vercel reported it could not access the repository; the GitHub App permissions had to be updated.

Evidence: Chat link (https://github.com/DIVYAPRIYADHARSHINI-GIT/jobpilot)

Bug 6: Kanban drag and drop does not work on mobile (JobPilot)

Severity: Low | **Status:** Open

Steps: 1. Open Tracker on a phone.
2. Long-press a card and drag it to "Interview".

Expected: The card moves to the new column.

Actual: The page scrolls instead; the card cannot be moved without the status menu.

Evidence: Screenshot (https://jobpilot-zeta-tan.vercel.app/tracker)

Bug 7: Headless browser tests hang with no timeout (PowerWise)

Severity: High | **Status:** Open

Steps: 1. Run the 227-check e2e suite.
2. One page waits for translations that never load.

Expected: The check fails after a few seconds and the suite continues.

Actual: The whole suite stalled until it was killed.

Evidence: None attached

Bug 8: English text flashes before translations load (PowerWise)

Severity: Low | **Status:** Fixed

Steps: 1. Switch the language to Tamil.
2. Reload the home page.

Expected: The page appears directly in Tamil.

Actual: English copy shows for a moment before switching.

Evidence: Screenshot (https://powerwise-dusky.vercel.app)
